THE ENCYCLOPEDIA BRITANNICA.

NINTH EDITION. AMERICAN REPRINT.

THE ORIGINAL VERSION OF "THANATOPSIS."

[We reprint below "Thanatopsis" as it originally appeared in the North American Review of September, 1817, for the convenience of those who wish to compare the earliest with the latest, most familiar and greatly improved form of the poem. Four rhymed stanzas, of irregular length, preceded by a short preface, were first printed in this, according to Mr. Bryant, was owing to a mistake of another.]

"Behold a solemn day, the sun is gone,

The all-holding sun, shall see no more,

In all his course, nor yet in the broad ground,

Where all his pale forms were seen, with tearful tears,

Now in the ocean of ocean shall exist,

The image, Earth, that nourished thee, shall

Grow, to be ready'd to meet again; again,

To mix forever with the clemets,

To be a brother to thy insensib'e rock,

And the sluggish clod, which, while it sat,

Shall send its roots abroad, and pierce thy

Thou to thy eternal resting place, Indeed;

Shalt thou retire alone,—no comrade dost wish,

That couch most fragrant, where thou lie,

WEDNESDAY, NOVEMBER 15, 1878

ANNOUNCEMENTS.

Superintendent of Public Instruction.

DR. H. A. M. HENDERSON, of Bourbon county, is a candidate for re-election to the office of Superintendent of Public Instruction.

HON. Z. F. SMITH, of Henry county, is a candidate for Superintendent of Public Instruction.

Trust in the Future.

What will we turn to next? Politics will have a lull, and the country will, for once in a long time, be free from the political issues that have so much embarrassed and troubled the election. Now, the Legislators will, in December, take the matter in hand, and Congress will dispose of them for good or evil. From the result of the fall election, the Democratic party will have the ascendancy in that body, and from the course of the party in the last session of Congress, we will be able to predict their action. To the Democratic party will the Greenbackers look for support of their measures; for themselves they have not enough to form a respectable committee, and to the Republicans, now less than ever, can they hope for help. To the great monied power the Republican party has placed itself under obligations. Body and soul they belong to it, but they have been shorn of the power they have heretofore held, and although with the powerful influence of New York's monied control, they will be harmless for evil, and nothing is more certain than the decay of that party. The apathy in the west proves, beyond a doubt, their hold upon the support of the people is gone. The south is given up. To the east alone they must look for a continuance of existence. This is too meager in force to maintain a national party, and from sheer necessity they must sing their dying note and bid adieu to spoil and plunder, power which they abused, offices of which they were unworthy, confidence which they forfeited, hopes and expectations they blasted and a country wronged. Soberly, they the people, will turn to the party of their early affection, the choice of our fathers, the legacy of the patriots, and find as they always found succor in time of need. The enlightened patriotic statesmen of the south will redeem their pledge.

The Congressional election in this State last week resulted in the election of nine Democratic nominees and one independent Democrat. In the first district, Col. Oscar Turner, independent Democrat, beat Judge Trimble by about 1,000 majority, but it is quite probable, from all we have heard, that Col. Turner is the better Democrat of the two. In the second district, the gallant McKenzie has been re-elected by about 4,000 or 5,000 majority, having, as far as we can learn, up to this time, carried every county in the district. F. M. (Flax Mane) English had his usual luck—a small vote. In the third district, Col. John W. Caldwell was re-elected by about 1,200 majority. Hon. J. Proctor Knott could not possibly have been beaten in the fourth. In the fifth the gallant, noble young statesman, Albert S. Willis, beat the combined influence of money, treachery, bribery, corruption and fraud, Radical and National elements, and was re-elected by a handsome majority. Hon. J. G. Carlisle was re-elected in the sixth. Hon. J. C. S. Blackburn in the seventh. Little Phil Thompson was elected from the eighth by over 2,000 majority. Turner from the ninth by a good majority. The gallant Judge Plister, from the tenth district, carried every county, and is elected by 4,000 majority. In many districts a small vote was polled, because the result was plainly foreshadowed.

Election News.

The election in this county on the 5th instant, passed off very quietly with less than a half vote polled. The following is the vote by precincts:

M. E. Feighan Eng.	57	68	30
Cool Springs	25	9	0
Roskport	72	47	15
Centerton	85	39	28
Buford	75	17	17
Forderville	38	31	11
Mount Austin	63	63	01
Hartland	154	86	30
Bear Creek	97	18	21
Cromwell	41	45	11
Sharts	97	92	30
Salisbury Springs	26	25	35
Bartlett	55	60	08
Total	854	392	238

Total vote..... 1594
The total was last Aug. 25..... 3409
At Bartlett Shows, 10 votes

THE BANNER DISTRICT.—Bartlett's is now the banner district of Ohio county. It did not cast a single vote for the Republican candidate for Congress. This is due, in a great measure, to the active influence of T. J. Smith and Marion Yates. Mr. Ben Shown got ten votes in this district.

The first day of May, 1879, has been fixed for the time of holding the Democratic State Convention and Louisville the place. We are pleased with the place, but candidly think it ought to have been held at an earlier date, as no man, unless it be Little Phil Thompson, could canvass the State in three months.

The Result.

Tuesday's election resulted in a gain to the Republicans and a loss to the Democrats. This is partly due to the Greenbackers, for in almost every instance they drew more from the Democrats than the Republicans, and thus helped to elect hard money National bank men.

So far as heard from, there have been 141 Democrats, 131 Republicans and 14 Greenbackers chosen, with California yet to hear from, in which State the election will not take place until September, 1879. California now has two Republican and two Democratic members, and the result in 1879 will, in all probability, be about the same.

The Democrats have a majority of 13 over the Republicans. It is best to have the parties nearly evenly balanced, for it will secure a more careful legislation.

The following is the political complexion of each State: Alabama, 8 Democrats, Arkansas, 4 Democrats, Colorado, 1 Republican, Connecticut, 3 Republican and 1 Democrat.

Delaware, 1 Democrat, Florida, 1 Democrat and 1 Republican. Georgia, 9 Democrats, Indiana, 6 Republicans, 6 Democrats and 1 Greenbacker.

Illinois, 12 Republicans, 5 Democrats and 2 Greenbackers. Iowa, 7 Republicans and 2 Greenbackers. Kansas, 3 Republicans. Kentucky, 10 Democrats. Louisiana, 6 Democrats. Maine, 3 Republicans and 2 Greenbackers. Maryland, 1 Republican and 5 Democrats. Massachusetts, 10 Republicans and 1 Democrat. Michigan, 9 Republicans. Minnesota, 2 Republicans and 1 Democrat.

Mississippi, 6 Democrats. Missouri, 12 Democrats and 1 Greenbacker.

Nebraska, 1 Republican. Nevada, 1 Republican. New Hampshire, 3 Republicans. New Jersey, 4 Republicans and 2 Democrats and 1 Greenbacker.

New York, 25 Republicans, 8 Democrats. North Carolina, 3 Republicans and 5 Democrats.

Ohio, 9 Republicans and 11 Democrats.

Oregon, 1 Democrat. Pennsylvania, 16 Republicans and 3 Greenbackers.

Rhode Island, 2 Republicans. South Carolina, 5 Democrats. Tennessee, 1 Republican and 9 Democrats.

Texas, 5 Democrats and 1 Greenbacker.

Vermont, 2 Republicans and 1 Greenbacker.

Virginia, 1 Republican and 8 Democrats.

West Virginia, 3 Democrats. Wisconsin, 5 Republicans and 3 Democrats.

Large Call.

Mrs. Mildred A. Barnett has a cow with a young calf which was over two feet high when calved and otherwise well proportioned,

Our Educational Editor's Views Meet with Approval.

EDITOR HERALD.—Professor Hawkins, of the Educational Column, has hit the nail on the head, and while I have been looking for some one to tackle the book monopoly, I hardly thought a teacher would undertake to tell the truth, and give the great swindle a little proper airing. If the fault lies alone with the book concern, give it to them, Professor Hawkins, in that candid style for which you are noted; and if at the door of the Superintendent, or any other authority or agency, let them hit it hot and heavy; for no wrong is greater to the educational interest of the State, no imposition deserves more justly to be rebuked. The enormous prices paid for the school books almost amounts to a prohibition of educating the children, and the cheap and worthless manner of getting them up is dishonest. Give it to them, Professor, you are right, and the people will stand by you, and many others have thought upon this same subject, and longed to see some one expose the wrong.

EDITORIALS.

H. G. McHenry, Dr. Luke P. Blackburn and Senator Beck passed the most enterprising city in Ohio county to-day, on their way to Paducah—Rockport Register.

"Oh, what is a place in the temple of fame,
The hope of a statesman or sage."

THE BANNER DISTRICT.—Bartlett's is now the banner district of Ohio county. It did not cast a single vote for the Republican candidate for Congress. This is due, in a great measure, to the active influence of T. J. Smith and Marion Yates. Mr. Ben Shown got ten votes in this district.

The first day of May, 1879, has been fixed for the time of holding the Democratic State Convention and Louisville the place. We are pleased with the place, but candidly think it ought to have been held at an earlier date, as no man, unless it be Little Phil Thompson, could canvass the State in three months.

Jake Tichenor has got a bran new wagon—Rockport Register.

Please tell us, Brother Shannon, whether it is a wheat-bran, or a meal-bran new wagon.

Registrars.

The Register should change its name to Echo. See "Duffy" in last number. It would be more suggestive.

As the Register man has imposed upon us to furnish the text for his writings for the last two weeks, we propose to edit both papers hereafter.

For Itself:

I have been a long time silent—seeing that now, your paper has grown to be one of the fixed facts, and so general a favorite, you have correspondents so much abler to interest your many readers. I would, perhaps not have written this, but seeing the letter from Nancy Jane Jones in your paper of a recent date, and served until March 1833, and Ab. McLean was appointed and served until September, 1841, when John Calhoun was appointed; and since that time several distinguished judges have served.

CERES, GODDESS OF CORN.

Ceres was the goddess who presided over corn and agriculture. She was usually represented holding poppies, or with a garland of them in her hand. Long yellow locks waved down her shoulders to denote the goddess who ripened the corn—anciently called Ceres, and in modern times, Carboline, the heat of hair restorer, cooling and cleanly deodorized and nicely perfumed. It cleanses the hair from impurities, heals the scalp of all diseases, causes the hair to grow long and luxuriant, and, in fact, perfects itself as a hair dresser, renewer, or restorer. Sold by all dealers in drugs and medicines.

SCIENTIFIC.

Scientists show us that they can trace a period when the North Sea did not exist, and, at the same time, that England and Scotland, and parts of France were joined to the continent of Europe. This was long before American enterprise unearthed Carboline, the Wonderful Hair Restorer, Nature's remedy, made from petroleum, thoroughly deodorized and delightfully perfumed. It will perform all that is required of it, including restorer of bald heads; cleanses the scalp from dandruff and all impurities; invigorates weak and sickly hairs; tones the hair bulb into a natural and healthy action. It is penetrating that it reaches the seat of disease, the hair bulb, and the benefit is also immediate. It is cooling and cleanly, and too much praise can not be bestowed upon it. Sold by all dealers in drugs and medicines.

Fastest Mile Ever Trotted by a Four-Year Old.

At Lexington recently Maud S., a four-year old, made the fastest time ever made by a four-year old. She made the first quarter in 33¹/₂ seconds, half mile in 1:06, three quarters in 1:41, and a mile in 2:17. If she improves with age, she will beat Goldsmith's Maid, Rarus, or any other time ever heard of.

One of the most pleasant and delightful parties of the season was given on last Thursday evening by Judge Gregory and lady to the bride and groom, Mr. and Mrs. D. E. Thomas. The participants were the friends of the happy pair, and citizens of Hartford and vicinity. Mrs. Thomas entertained us with music skillfully performed on the piano, accompanied by vocal music by her husband. The supper was in the superb taste of Mrs. Gregory, and the evening passed away delightfully. Late in the evening, the colored band gave the party some of their finest music in a serenade.

The Hartford House has had a big week—crowded from cellar to garret and stable full of horses, King knows how to keep hotel and is one of the best liveries men in the county. What he does is to get the best horses and to care for them, and to make them look as good as possible.

WEDNESDAY, NOV. 13, 1878.

General Local News

Mrs. Wm. H. Hardwick and Mrs. R. S. Moseley, spent Saturday and Sunday in Pleasant Ridge.

Messrs. John W. Lewis and Joseph Hunter, of Rosine, spent a day or two in town this week.

Messrs. Frank Turpin and George Cooper, of Beaver Dam, spent Sunday in town.

Ladies, if you want to see the finest Sewing Machine in the country, go to Ford's.

Circuit Court began last Monday. Judge Stuart is presiding, and dealing out justice with his usual skill.

Judge James Stuart, of Owensboro, arrived last Saturday evening, and is the guest of Mr. Caleb Crow.

Lamps of every size and quality, lanterns, too, never so cheap before we are now being sold at Ford's.

Mrs. E. C. Hubbard, of this place, returned last Tuesday from an extended visit to relatives in Chicago, Illinois.

Remember, E. Small has a better and larger stock of Shoes and Boots and sells them cheaper than any house in the Green River Country. Please call and convince yourselves.

We learn that Charles and John Hendrie, two brothers, had a fight near Rockport mines last Saturday. Shame on you, boys. Brothers, at least, should dwell together in unity.

We regret to learn of the death of the wife of Dr. George W. Chapman, of Bartlett's practice. She has been afflicted for a long time with rheumatism, and was taken worse a few days ago, and died last Sunday night.

Messrs. W. C. Morton & Co., have purchased the lease of the Mayfield Water Elevator and Purifier, for Ohio county, and are prepared to fill orders thereto. If you want the best and easiest water drawer in the world, buy one.

The revival at Mount Olivet church is still going on. Rev. J. M. Peay is there now, doing a noble work. The interest is increasing, and many have found comfort while others are seeking the way of salvation. Come and see it.

The members of Hartford Lodge of Good Templars, are earnestly requested to attend their meeting to-morrow night, as installation of officers will take place and other business of interest is to be attended to.

Messrs. J. T. Griffith, of Owensboro, and H. W. Lewis, of Rosine, who have been on a hunting expedition in this, and Grayson county, for a week or ten days past, were in town last Sunday. They report quite a success, as well as a successful hunt.

It is dangerous to one's health to wear a light summer suit now, therefore, go to Winter & Co's corner third and market streets, Louisville, Ky., and purchase one, which is heavy, for yourself or boy, prices low.

The young people had a singing, or rather a talking school, Sunday night. Those who attend singing and cannot or will not sing themselves, ought at least keep quiet so those who do sing can have an opportunity of doing so.

Mr. W. H. Martin, this place, is engaged in building a kitchen for the Hartfort House, Hartford.—Rockport Register.

Mistake again. W. M. Martin, of Rockport, was here last week at work.

It is a pity the Register man has not energy enough to learn the proper initials of the prominent men of his own town.

Stoves at bottom prices, at

Geo. Klein & Bro's.

Hartford is now better supplied with side-walks than it has ever been. We notice a new one has just been completed from Judge Moseley's to Jesse Potter's.

We suppose the federal authorities ought to be informed that W. P. Leach of Liberty neighborhood, is harboring a Southern sympathizer, who made his advent a short time ago, not, however, unexpected. Weights some less than ten pounds.

Our young friend, Sam'l P. Dalton, the present efficient representative of the Singer Sewing Machine in our county, informs us that he has been very successful in selling machines the short time he has been here. His success is easily accounted for; he furnishes a *fitter* with each machine.

VERY PROLIFIC.—Mt. Wm. Foster has a poland-china sow that has dropped forty-six pigs inside of the last two years. In December, 1876, she dropped nine; the next litter in September, '77, she dropped eleven; in April, '78, she dropped seventeen, and in this month she dropped nine. A single brood so like this is enough for any ordinary farmer.

The members of the Literary Club met at Mrs. E. D. Walker's last Monday night and organized. Miss Eva Griffin, was elected President; Mrs. Pendleton, Vice-President; Lucy Barrett, Secretary. Miss Eva Walker was selected as editor of the first paper, to be read at Dr. Pendleton's next Friday night. The evening, after organization, was spent in music and fun.

Mr. W. T. Johnson, who has had charge of the Hartford Woolen Mills and Carding Machines, for several years past, left yesterday morning for Readville, Butler county, where he will make his future home. Tom is a clever young man, a good mechanic, and the place made vacant by him can scarcely be supplied with one so faithful and competent. He will return in a week or ten days to settle up his business.

Little Mary, daughter of Mr. and Mrs. Z. Wayne Griffin, has been afflicted with a severe attack of inflammatory rheumatism for several weeks past. The little sufferer has borne her illness with great fortitude, while her fond parents have watched over her with that care and anxiety alone known to kind parents. She is thought by her physicians to be a little better. Mr. and Mrs. Griffin have the sympathy of the entire town in the severe affliction of this, their only child and idol.

The Mayfield Water Elevator and Purifier.

We purchased of J. W. McKay, general agent, one of these water drawers and had it placed in our well last week. We unhesitatingly pronounce it to be the best thing to get out of a well conveniently and easily that we have ever seen. It also purifies, in place of rendering the water impure, as is the case with some kinds of pumps. It carries air to the bottom of the well as it goes down; which, escaping, comes bubbling up through the water, cleansing and purifying it. After having tried it one week, would not be without it for twice its value. A model of it is seen at W. C. Morton's grocery store.

WANTED.

Two mules twelve and a half or thirteen hands high, to work in the mines. Apply to

W. G. DUNCAN,

McHenry, Ky.

Mrs. W. O. Liles, of No Creek, brought us a squirrel killed by him, on last Thursday, that is a cross between the grey, and that family of white squirrels, found in that neighborhood. It is white on the front part of the body and the farther back the greyer it is—its tail being considerably grey. Mr. Liles has seen three white squirrels during the season in the same woods. We have this one stuffed and on exhibition in our office.

We have been blessed with good weather this autumn; but last Sunday night the clouds began to obstruct the view of the firmament, and by Monday morning they were quite spic. The rain soon began to fall, and take it all in, it was rather a pluvious day.

A Cross.

Hartford is a Live Place.

We have nothing but the best wishes for the small towns that are springing up around us, especially in the county. Will they injure Hartford? may be enquired. Not at all. The more business done in the county the better. We wish it was ten times as great. If all the places were to grow ten times faster it would only be for the advantage of the whole county. The more people the more business and consequently the more money. Hartford has nothing to fear from competition.

We have as good business men as anywhere in the State, as much capital as any place of its size, and from that will sell as low and compete with others successfully. Our merchants lay in heavy stocks; so do our grocers, and very readily sell them. Considering the time, it is marvelous to see the vast quantity of goods and groceries that are in Hartford. Other business seems equally as good, and the people really seem cheerful and business like.

We notice farmers with wagons constantly in our streets, disposing of their produce, and an activity in affairs that looks city like. We are far from believing in selfishness. Come to Hartford and see for yourselves.

An Old Citizen of Ohio County Now in the Far West.

We learn from Cortez X. Bean that Rev. Thos Taylor, who many years ago was a citizen of Ohio county, is now a citizen of Tumwater, Washington Territory. He is now 87 years old. He built the old jail in Hartford, the old clerks' offices that were torn down a few years ago, and probably, to that we are not certain about it. He was at one time pastor of Beaver Dam Church. He was first a Methodist minister, but in the division of that church North and South, he became dissatisfied and joined the Baptists. He moved from here to Illinois and thence to Oregon, and here he has lived about twelve years. Many of our old citizens remember him, and he has a host of relatives in this country now. He left here about 1840. His health is good. His drug and doctor bills has not amounted to \$20 in twenty years.

Choctaw New Orleans molasses and sugar, new crop, at

WILLIAMS BROS.

Hartford is now better supplied with side-walks than it has ever been. We notice a new one has just been completed from Judge Moseley's to Jesse Potter's.

We suppose the federal authorities ought to be informed that W. P. Leach of Liberty neighborhood, is harboring a Southern sympathizer, who made his advent a short time ago, not, however, unexpected. Weights some less than ten pounds.

Our young friend, Sam'l P. Dalton, the present efficient representative of the Singer Sewing Machine in our county, informs us that he has been very successful in selling machines the short time he has been here. His success is easily accounted for; he furnishes a *fitter* with each machine.

We call particular attention to the card of James O'Connor, boot and shoe maker, which can be found elsewhere in this issue. He is a faithful, efficient workman, and can always be found at his post. Give him a trial.

M. F. Hines, the popular young grocer, assisted by Mr. Frank Kimble, has supplied a want long felt here, viz: a regular meat market, and the place made vacant by him can scarcely be supplied with one so faithful and competent. He will return in a week or ten days to settle up his business.

We have as cheap Groceries, Stoves, hollow, tin, hardware as can be found in the county, considering the quality. Give us a call and be convinced.

WILLIAMS BROS.

We have a reply to "Lance," received too late for insertion this week, but it will appear next week

The best Lippington chopping ax, from 65 to 85 cents each, at

GEORGE KLEIN &

THE HERALD.

KENTUCKY CROPS.

October Report (Complete) from the Bureau of Agriculture, Horticulture and Statistics.

There has been this month no material change reported in the crops grown during the year. The only staple not harvested is corn, which has, owing to the late fall, matured in excellent order. The fact that a "killing frost" did not appear in Kentucky until the 24th of October is unprecedented in our annals. This gave ample time for the maturity of all the outstanding tobacco, but may prove quite detrimental to the fall-sown wheat by affording a good season to the Hessian fly to deposit eggs upon the tender wheat plants. There is great complaint among our farmers about the low prices of all kinds of agricultural products, particularly for hogs, corn and mules.

Winter wheat has been sown in acreage about equal to last year's crop, although the preparation of the ground has been better than usual, and more pains have been taken to use the very best of seed. The proportion of drilled wheat is far greater than ever before in the State, and some few farmers have drilled small patches at sixteen inches space, so as to try experiments next spring in cultivating the land between the drills. This method of culture has been repeatedly tried in various sections of the United States, and always with marked success; sometimes over sixty bushels to the acre have been harvested from land cultivated in this manner. The horsemen or the narrow cultivators fixed similarly to the drill-teeth on the axle-tree of the drill-wheels, do the work of cultivation. There has been an increase in the amount of chemical fertilizers used on wheat lands this season, notwithstanding some unprincipled dealers have sold to our farmers for pure bone dust mixtures that were more than half sand and white clay. There ought by all means to be a law requiring every dealer to guarantee the mineral fertilizers sold by him to come up to the printed schedule (attached to each package) when tested by a chemical analysis. An attempt was made to have such a law passed by the last Legislature, but from some cause it failed to receive the attention of the members.

It always improves wheat on 100 pounds of old park-house salt, as it strengthens and glazes the stalks, thereby preventing rust, and also the lodgement by winds. Ashes are always good fertilizers, but should be sown over land by themselves, as they will (if mixed with other fertilizers, such as superphosphates, etc.) liberate the ammonia, and thereby cause a loss of one of the best elements used by plants as food.

The barley and rye sown this fall are in acreage, each 100, and the cultivation much better than last year.

The other crops are reported in yield about the same as they were last month, except corn, which is not so good as was anticipated. A fair report of the yield this year will be for tobacco, 70; corn, 80; wheat, 85; barley, 110; oats, 105; grasses and clover, 105; peaches, 100; apples, 60; pears, 70; other fruits, 95.

Liv Stock.—There has been a decrease in the number of mules raised, owing to the low prices now obtained for them in the Southern markets. Horses are in numbers fully an average; cattle about 90, and sheep and hogs each 105. Hog cholera is less destructive than it has been any year since the war. Stock cattle and stock hogs are largely on the increase in the mountain counties.

Bees and Poultry.—More attention is given each year to the production of poultry and honey in almost every county in the State, but particularly so in those counties having large towns through which railroads pass. The numbers of chickens, ducks, geese and turkeys are greater than were ever before known in the State, while there is among poultry fanciers a laudable rivalry regarding the production of the best breeds for eggs and flesh, such as has seldom been experienced in this country. The yield of honey has been greater by 20 percent, than a similar crop for any other year, and is of most excellent quality. In Warren, Allen, Simpson and some other counties along the Tennessee State line, the yield of honey has been below an average, and some bee-keepers will find it necessary to feed swarms during the fall, winter and early spring, with syrup made of sugar and water, in order to carry them safely through the cold weather.

Tobacco Beds.—The months of November and December are the proper time to burn tobacco beds, while the ground is dry, and but little wood or brush is needed. Burn as soon as the weeds and grass have thrown off their seeds, and sow, after burning, the usual quantity of seed, and resow about the last of February or the first of March. This will insure a good supply of plants. The early and late sowing in the same bed will not interfere the one with the other.

Orechards.—Now is the time to prepare land for orchards and vineyards, which can be planted at any time from now until the first of May. Apple trees about half that distance I will here repeat a list of fifty apple trees, and also a list of fifty peach trees,

which have been highly recommended by some of our best orchardists in the State:

A LIST OF FIFTY APPLE TREES FOR FAMILY USE.

SUMMER.—Early Harvest, 2; Summer Pearmain, 2; Cheingo Strawberry, 2; Sweet Bough 2.

FALL.—Fall Pippin, 2; Fall Queen, 2; Maiden Blush, 2; Rambo, 2; Porter, 2; Munson's Sweet, 2.

WINTER.—Ben Davis (N. Y. Pippin) 2; Yellow Bellflower, 2; Lansingburg, 5; Milan, 2; Newton Pippin, 2; Prior's Red, 2; Limber Twig, 2; Rawl's Sunet, 3; Redwinter Sweet, 2; White Heath, 5.

A LIST OF FIFTY PEACHES FOR FAMILY USE.

Early Beantree, 5; Froth's Early Red, 5; Codger's Favorite, 5; Crawford's Early, 5; Catherine Cling, 5; Hopkinsville (Bryan's) 5; Old Mixon's Free, 5; Ward's Late, 5; Smock's Free, 5; White Heath, 5.

The President has issued a proclamation, setting apart Thursday, November 28, as a day of Thanksgiving.

Kentucky is the banner State for Good Templars. It has 30,000 members. The remainder of the population—numbering about 1,470,000—take more or less old Bourb. in theirin'—Covington Commonwealth.

Out of seven physicians who went to Memphis from Cincinnati, three only returned alive—the following four succumbed to the dread malady while in discharge of duty: Drs Tuerck, Burchard Pearce and Tate.—All honor to these noble disciples of Esculapius.

FALL.—Fall Pippin, 2; Fall Queen, 2; Maiden Blush, 2; Rambo, 2; Porter, 2; Munson's Sweet, 2.

WINTER.—Ben Davis (N. Y. Pippin) 2; Yellow Bellflower, 2; Lansingburg, 5; Milan, 2; Newton Pippin, 2; Prior's Red, 2; Limber Twig, 2; Rawl's Sunet, 3; Redwinter Sweet, 2; White Heath, 5.

A LIST OF FIFTY PEACHES FOR FAMILY USE.

Early Beantree, 5; Froth's Early Red, 5; Codger's Favorite, 5; Crawford's Early, 5; Catherine Cling, 5; Hopkinsville (Bryan's) 5; Old Mixon's Free, 5; Ward's Late, 5; Smock's Free, 5; White Heath, 5.

The best fertilizers for orchards are wood ashes and tobacco stalks. A good chemical fertilizer for orchards is a compost of German point—bone-dust and fish-scrap, in equal parts—applied about the roots of the trees. For pears, cherries and peach trees, in addition to the above iron cinders are very advantageous.

W. J. DAVIS, Com.

Get a Reputation.

Success in this world depends upon a reputation. In spite of all that is said, there is a great deal in a name, and a good name pays. When we want to buy an article we hunt for one that has a reputation for being good—that is for one made by a manufacturer who has established a character for making good articles—and when we find it, pay more for it than we would for a similar article, which, for ought we know, may be just as good, but which was made by somebody we never heard of. The reason for this is obvious. We are willing to pay for the assurance of warranty which the trade mark of a reputable maker gives us, rather than trust our own judgment, or the chance of getting a good thing from an unknown source. This is so with machinery, tools, clothing, and nearly everything else that we buy, including the products of the farm. There are farmers who have been selling their butter this summer for fifty cents per pound, contracting for it in advance. Others very likely have sold just as good for thirty-five cents, and the difference has been owing to the fact that the former had a reputation and the latter had none. When our citizens bought the butter of the first class they felt certain that they would get a gilded article. When the other butter was put upon the market, it had to be sold with the risk of not being number one; and the same is true of cheese, milk, cider, vinegar, pork, and, in fact, of all that is bought and sold in this city. It is easy then, to see how important it is for a farmer to establish a reputation—to get the name of raising and selling the best. When he has done this, his produce not only sells readily, but at almost his own prices.

A reputation is a plant of slow growth. It takes not only time, but constant, vigilant care. To get a reputation for the butter of a certain farm, for instance, it must not only produce the fine article, but it must continue to do so all the time; there must be no breaking of the chain, for a reputation, like other things, is only as strong as its weakest part, and a single poor article will neutralize the effect of fifty good ones. When a man buys a thing upon the reputation of the maker, he wants to feel that there is certainty of his getting a good thing. If he can have this he is willing to pay for it on top of market price, but he will not pay extra for a mere probability. We ask our farmer friends to remember this, and to build up themselves a reputation. When a good thing is sold as a good thing let it be good, without any ifs or buts; and if, perchance, a poor thing must be got rid of, let it be sold as poor. When you put an article on the market, let it be understood beyond a doubt that it is all you recommend. This is not only honesty, but, as we have shown, money in your pocket.
